

Calculating your GPA

1. In the chart on the next page, list your classes.
2. In the second column, list the grade for that class.
3. In the third column, translate the grade to a grade point using the chart below.
4. In the fourth column, list the credit value of a class. A one-year course should require a minimum of 150 hours of work, and is worth 1 credit. A semester course should require a minimum of 75 hours of work, and is worth 0.5 credits.
5. In the fifth column, multiply the amount in column 3 by the amount in column 4.
6. Follow directions for the other cells.

Letter grade	A+	A	A-	B+	B	B-	C+	C	C-	D+	D	D-	F
Point value	4	4	3.7	3.3	3	2.7	2.3	2	1.7	1.3	1	0.7	0

To find your cumulative GPA across several semesters or years, add all the point totals together, and divide by the total number of credits.

GPA Calculator

Class	Grade	Point value	Credits	Point value x credits
		Total these two columns-->	Credit total	Point total
			Divide point total by credit total -->	GPA =
